To Whom It May Concern:

RE: Walkowicz Residence: 21 Woodside Drive, Warwick, NY

As part of the Woodside Drive project, E. DePietro & Son Construction Company will fully inspect all leader drains to ensure proper stormwater management measures to drain stormwater to the road. After inspection, any faulty leader drains will be repaired or replaced as needed. Please note: All leader drains will be installed on both corners of the south side existing structure and the new addition as indicated on the site map and directed toward the roadway/storm drain.

In addition, Silt fencing, or similar NYSDEC approved erosion control practices, will be placed along the southern property line to prevent sediment laden stormwater from discharging onto the neighboring property. The approximate area of the silt fencing is indicated on the site map.

The air conditioning condenser concrete pad will be placed on the west side of the house (back of house). An approximate location is indicated on the site map.

Feel free to contact me with any questions.

Thank you,  
Edward DePietro
